ASSOCIATED WITH HUNTING SINCE 1856

“Creativity” is the result of curiosity applied to a subject or task.

“When a new rifle is created at ANSCHÜTZ, there will have been dozens of creative moments and hundreds of decisions on the path to perfection. This can never be the work of just a single person - it is teamwork in perfection. Absolutely unthinkable without the curiosity and motivation of each and every co-worker!

Every one of them is a competence center at ANSCHÜTZ.

Even though we are justifiably very proud of the finished product: In principle, the route taken is the more important part. You can only achieve the goal yourself, in the process we always re-learn something and learn something new. The goal, however, sometimes has something final about it, and is thus “uncreative”.

I would like to thank our employees for their creativity!
And I would like to hope that you can detect how much creativity has been realised in our hunting rifles!”

Maximilian Anschütz

"The continuous development and optimization of our products has the highest priority. The latest development in our hunting rifles is the 1782 Gold Line model, which impresses with an luxury optic and even smoother bolt movement - see for yourself!"

"Good hunting!"

1782

THE NEW DAY

The sky is reddening. Remnants of night-time grey, pale yellow. The morning dew hangs in the air and coats the wood on the hunting stand. Hoping for the first quarry.

An owl heard hours ago, a woodpecker hammers in the distance. The twilight is filled with waiting.

There! A branch moving against the wind! No rapid movement at all – not a word, no noise of any kind! Get your rifle. Time expands. Carefully change your position.

The game shows itself.

Aim. Release the safety catch silently, completely silently. Very good rifle! The correct choice. High-tech without pomp and grandeur, straightforward design, precise and rapid action. The eye looks through the telescopic sight, the finger on the trigger senses the two stage. Infinitely fine trigger adjustment. The stock radiates an intimate feeling and transfers to the body.

Waiting becomes concentration.

1782 GOLD LINE

EXCLUSIVE REFINEMENT, MAXIMUM DURABILITY

The 1782 Gold Line radiates elegance, individuality and impresses with its exclusive appearance. The gold-colored components are titanium nitrided (TIN). This optically very attractive titanium nitride is an all-round coating that has been tried and tested for decades thanks to its versatility and balanced properties. The attractive, golden color and the high abrasion resistance of this coating are ideal for the highly stressed components of the breech case, firing pin and trigger blade.

This exclusive overall package is rounded off with an elegant walnut bolt knob and premium wood grade stock, all of which are included in the Gold Line scope of delivery. The 1782 Gold Line can be configured with any stock design, barrel length and caliber as a right hand version.

See pages 18-19 for more information on each Gold Line component.

1782 GOLD LINE PRODUCT INFORMATION

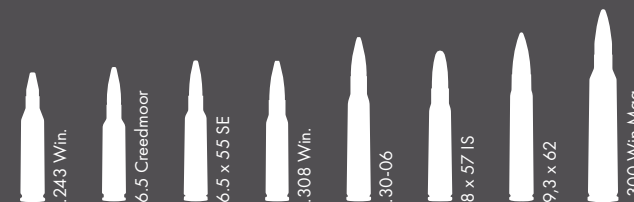

Single stage trigger 5082 D: factory set to 1.100 g

Total weight, depending on barrel length: 3.750 - 4.050 g

Two stage trigger 5082: factory set to 750 g adjustable from 750 - 1.200 g

Important: Barrel lengths depend on caliber, not all lengths are possible for all calibers. For more information see page 20-21.

Scope of delivery:

Model 1782 Gold Line configurations come with a 3-shot magazine (with caliber .300 Win. Mag. 2-shot), thread protector, sling swivels, transport rifle case MEGA Version II (length: 118cm), original test target and quality control card.

1782 BLACK LINE

UNIQUE BOLT MOVEMENT

The 1782 Black Line is characterized by deep black DLC (Diamond Like Carbon) coated components. With the Classic PRO stock made of beautiful walnut and the height-adjustable black comb, you get an elegant and timeless overall package that is rounded off with a robust driven hunt magazine. The breech case, the trigger blade and the bolt knob are DLC-coated. The DLC coating gives these components a surface with excellent sliding properties and incredible hardness. This combination makes these highly stressed system components robust and resistant, and at the same time gives the bolt movement its unique, silky smooth and brilliant characteristics!

*Black
Line*

Model 1782 Black Line can be configured as right and left versions, **at no extra charge!**

ANSCHÜTZ

1782 GRS BIFROST

MADE FOR ANY SITUATION AND WEATHER

For friends of the modern synthetic stock. The Bifrost stock from the well-known stock manufacturer GRS is made of a fiberglass-reinforced composite material. Rubberized surfaces ensure a firm and secure grip when shooting. The SpeedLock 2.0 system allows the shooter to adjust the butt plate and cheek piece to his individual requirements and withstands any recoil without adjusting. Together with our high-precision 1782 barreled action, the result is a perfect and always reliable hunting companion, ready for the decisive moment.

GRS BIFROST

Shown: Model 1782 GRS Bifrost,
Caliber 6.5 Creedmoor, 520 mm
barrel and barrel thread M15x1.

ANSCHÜTZ

EINFACH EINS WERDEN!

1782 GERMAN STOCK

BALANCED, AESTHETIC AND TIMELESS

Made from walnut from age-old forests, visually and functionally refined with a non-slip checkering. Hard and deformation-resistant, natural and individual. No stock is the same as any other. The rubber butt pad absorbs the recoil and holds the rifle securely in the shoulder when aiming.

1782 German stock

German style stock with bavarian cheek piece. This stock is a timeless and elegant masterpiece which completely satisfies in terms of ergonomics.

1782 Thumbhole stock

The ergonomically shaped roll-over cheek piece in combination with the steep, non-slip pistol grip and the generously dimensioned grip hole guarantees an excellent shooting position.

ANSCHÜTZ

EINFACH EINS WERDEN!

- 1 Non-slip rubber recoil pad
- 2 German style stock, made of beautiful grown walnut

1782 THUMBHOLE STOCK

A SYMBIOSIS OF STYLE AND FUNCTION

A futuristic design that incorporates the attributes of a classic. Quiet and precise stop. The trigger finger remains strain-free and movable; it doesn't have to support anything. As for the carefully selected and mature walnut wood: a gentle oil bath gives the stock its matt appearance and protects it from the elements.

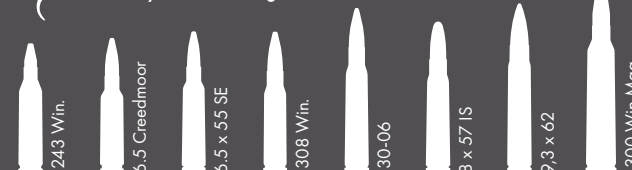

1782 MODELS PRODUCT INFORMATION

Two stage trigger 5082: factory set to 750 g adjustable from 750 - 1.200 g

Total weight, depending on barrel length: 3.600 - 4.050 g

Single stage trigger 5082 D: factory set to 1.100 g

1782 BARRELED ACTION REFINEMENTS

EXCLUSIVE COATINGS

Give your 1782 an individual design and choose your desired coating when ordering. Whether classic silver-colored hard chrome-plated (standard), deep black with high-strength and extremely smooth DLC coating or with the timelessly elegant gold-colored TIN coating. In addition, specially designed trigger blades and bolt knobs are available.

1782 Standard version

The 1782 models are always delivered with a silver-colored nitrated trigger blade, a black synthetic bolt knob and the hard-chromed, silver-colored breech case.

1782 Gold Line version

Refine your 1782 with elegant Gold Line components. Whether the trigger blade, breech case, firing pin or bolt knob - configure which components should be TIN-coated when ordering.

1782 Black Line version

Equip your 1782 with Black Line action components. Elegant, deep black DLC-coated components that turn your 1782 into a timelessly elegant overall package. Furthermore, the DLC coating noticeably increases the gliding ability of the breech case - for an incredibly smooth bolt movement.

Black Line, for right and left-hand versions

Deep black DLC-coated breech case with maximum gliding properties for an incredibly smooth bolt movement.

12. FIRING PIN

Standard

Made of high-strength steel, classic and timeless.

Gold Line

Gold-colored TIN-coated firing pin made of high-strength steel, an extraordinary addition for your 1782.

PRECISE INTERACTION

**MADE OF
WOOD AND STEEL**

1782

COMPLEX AND YET SIMPLE

Nothing convinces one more quickly and substantially than reduction, simplicity, purism - where nothing distracts and everything is pure concentration, every optical effect, every function. Such as with the ANSCHÜTZ centerfire hunting bolt-action rifle 1782. A hunting rifle that, in essence, consists purely of wood and steel.

Unpretentious and simple.

It is only with familiarization that one discovers the complexity of the 1782, and is amazed by its precision of modern engineering. Only then does the admiration increase, the owner's pride radiates in the unpretentious yet highly-complex rifle in his hands.

The 1782, a rifle that radiates calm and imparts competence. Welcomed attributes, so important during the hunt.

When we go hunting.

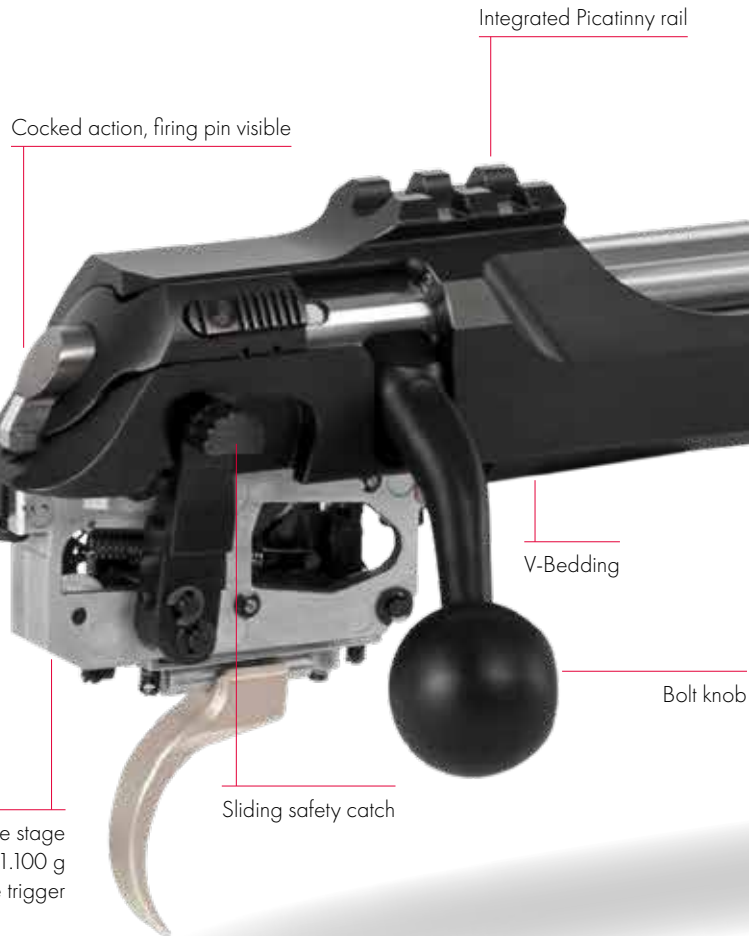

1782 ACTION

MADE TO WITHSTAND

Barreled action made from steel. Purity and quality - classically blued. Securely mated to the stock for outstanding shooting performance. Sturdy and resistant to heat and cold. Highly-precise surfaces that display elegance in design and allow the bolt to slide internally without any resistance. A reliable companion with unmatched precision and function. Timeless perfection! The integrated Picatinny rail enables flexible, simple and solid rifle scope mounting - even with attachments.

Bolt handle lock inactive

Bolt handle lock active

Bolt handle lock

60° bolt throw

1782 BOLT MOVEMENT

MOVING, SILKY SOFT, PRECISE, QUICK

A bolt movement that never fails to impress. Hard-chromed bolt, fine-ground for silky-soft repeating. Corrosion-protected. Two-row six locking lugs - a reliable, stable detail for the highest level of safety. On request available with gold-colored TiN or deep black DLC coating.

1782 MAGAZINE SIMPLE HANDLING, RAPID EJECTION

The magazine holds three cartridges, is made from sturdy stainless steel and is thus insensitive to dust, dirt and water. Convenient handling of the magazine as a result of the handy magazine base.

The magazine, which is located safely and securely in the magazine guide, is particularly easy to remove. Slight pressure with your index finger on the magazine release lever and the magazine slides out of the magazine guide!

Fast Release!

1782 Magazines available as 3-shot or 5-shot driven hunt magazines. For caliber .300 Win. Mag. 2-shot or 3-shot.

1782 PRECISION ANSCHÜTZ GUARANTEED

Before a 1782 leaves our factory in Ulm, each rifle is checked for shooting and safety; and then, the repeater receives the official proof house seal.

Before this can happen, we have already manufactured the 1782 so precisely, and assembled it so meticulously, that we are able to give each rifle a guarantee to take with it to the customer - **the ANSCHÜTZ guarantee of precision!**

It means that: Five shots, one after the other, will be a maximum of 1 MOA apart (center to center). In other words: The centers of the hits on the target are no more than 29 mm apart from each other!

For the following calibers, we guarantee, for 5 shots, maximum group sizes* of 1 MOA.

.243 Win. | 6.5 Creedmoor | 6,5 x 55 SE
.308 Win. | .30-06 | 8 x 57 IS | 9,3 x 62 |
.300 Win. Mag.

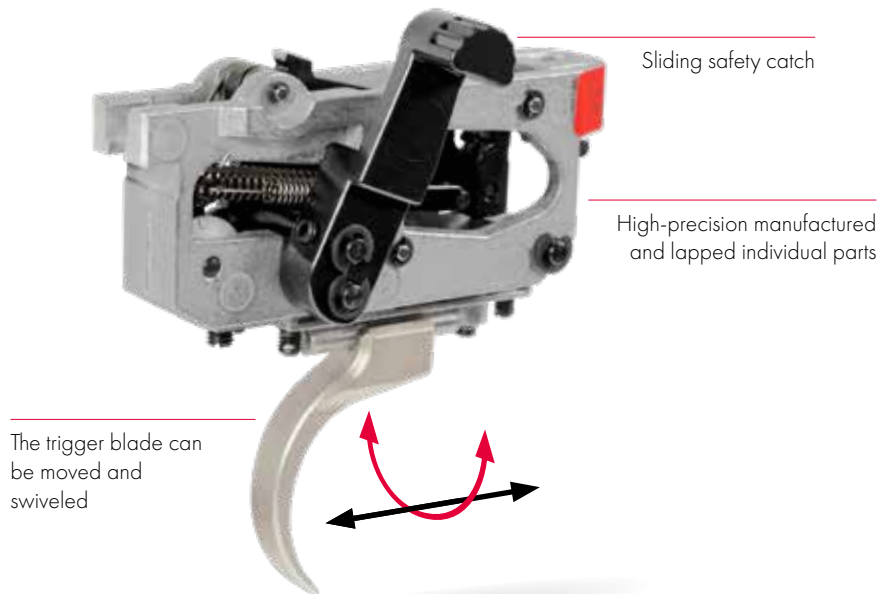

* shot using premium hunting ammunition

1782 TRIGGER PEAK OF THE ANSCHÜTZ COMPETENCE

Precision and refinement from high-performance sports - in summer and winter. Extremely wide adjustment range for the two stage and trigger weight. The location in the rifle with the decisive moment - high-precision parts in harmony in the tightest of spaces. For a single task! The perfect harmonization between man and rifle. Unparalleled.

There is nothing better.

- Trigger available as match single stage trigger 5082 D, factory-set to 1.100 g, or as match two stage trigger, factory-set to 750 g, adjustable by your gunsmith from 750 - 1.200 g
- Ergonomic and silent safety catch operation
- The trigger blade can be moved and swiveled

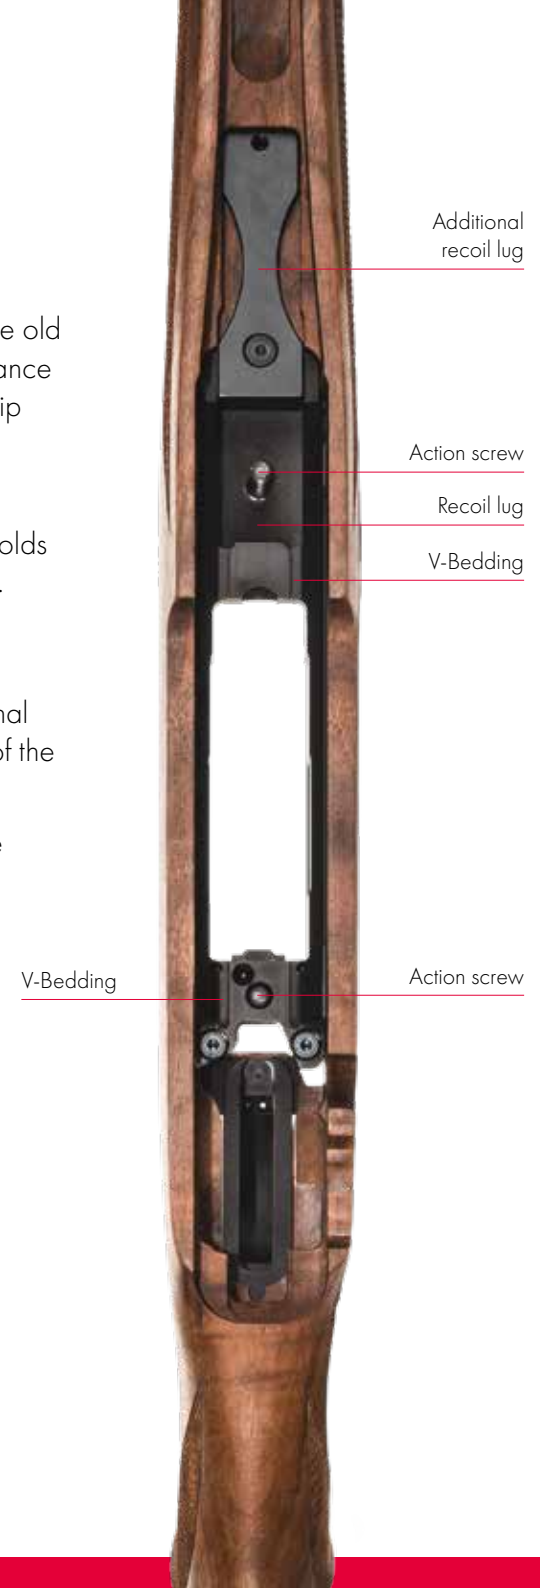

1782 THE STOCKS MAKE EACH RIFLE UNIQUE

Due to its qualities, Walnut is chosen from age old forests, then elegantly sculpted to form a balance between beauty and functionality with non slip checkering. Every stock rewards the senses, all are unique and distinctive.

The rubber butt pad absorbs the recoil and holds the rifle securely in the shoulder when aiming.

- Oiled walnut
- Solid aluminum action carrier with additional recoil lug for precise and sturdy bedding of the steel barreled action
- V-Bedding, an important guarantee for the overwhelming shooting performance
- Magazine release lever integrated in the trigger guard

ANSCHÜTZ

EINFACH EINS WERDEN!

1771

*UNCOMPROMISING
THE BEST FOR TWO WORLDS*

**.17 Hornet | .22 Hornet
.222 Rem. | .223 Rem.**

In our world where digital is the main thing, craftsmanship and experience almost seem to be outdated. ANSCHÜTZ guarantees to be always **uncompromisingly traditional** – but still act with the trend of the **modern world**! Ideas are our "software"; experience is carrying us into the future. Values are associated with purpose; we're experts in producing excellent firearms for exacting shooters. So you can proudly say:

My ANSCHÜTZ

1771

HIGH-TECH MASTERPIECE!

OK. We recognize that calling the 1771 a "high-tech masterpiece" sounds a lot like marketing speak and like we're promoting something. But how else could we describe a rifle that

- hits the target with fantastic precision;
- has an incredibly soft and extremely quick-to-repeat bolt movement;
- works reliably in all wind and weather conditions;
- is the ideal rifle for both hunting and target shooting: Additionally, it's also perfect for training in hunting schools and for use as a training firearm or in a shooting simulator!

So we thought all over that again, before finally realizing: That's right, it's really a "masterpiece". But we like also calling it simply: the **ANSCHÜTZ 1771!**

1771 GERMAN STOCK

BALANCED, AESTHETIC AND TIMELESS

Made from walnut from age-old forests, visually and functionally refined with a non-slip checkering. Hard and deformation-resistant, natural and individual. No stock is the same as any other. The rubber butt pad absorbs the recoil and holds the rifle securely in the shoulder when aiming.

German style stock with bavarian cheek piece.

Thumbhole stock with ergonomically shaped roll-over cheek piece and generously designed grip area.

ANSCHÜTZ

EINFACH EINS WERDEN!

- 1 Slip resistant rubber butt pad

Shown: Model 1771 Thumbhole stock, caliber .17 Hornet, 510 mm barrel and barrel thread M15x1.

1771 THUMBHOLE STOCK

A SYMBIOSIS OF STYLE AND FUNCTION

A futuristic design that incorporates the attributes of a classic. Quiet and precise stop. The trigger finger remains strain-free and movable; it doesn't have to support anything. As for the carefully selected and mature walnut wood: a gentle oil bath gives the stock its matt appearance and protects it from the elements.

1771 MODELS PRODUCT INFORMATION

Total weight, depending on barrel length: 3.470 - 3.630 g

Single stage trigger 5097/2D: factory set at 1.200 g adjustable from 1.000 - 1.700 g

Single stage trigger 5097/2D Tuning: factory set at 500 g adjustable from 450 - 650 g

Scope of delivery:

Model 1771 configurations are delivered, depending on the desired configuration, with 3, 4 or 5-shot magazine (.17 Hornet 5-shot, .22 Hornet 3-shot, .222 Rem./ .223 Rem. 4-shot), sling swivel, transport rifle case MEGA Version II (length 118 cm) and original test target and quality control card.

1771 GRS SPORTER

DETAILS WITH THE POWER OF DIFFERENCE

An exceptional stock, built in Norway. Ergonomics to perfection. Equipped with details that let you hit even safer. Adjustable butt plate for shooting from standing, kneeling, lying down. Vertically adjustable cheek piece for a relaxed neck. Transition zone between sport and hunting: It fulfills the needs of both areas.

The cheek piece and butt plate can be adjusted quickly and easily with the SpeedLock 2.0 system, depending on the aiming and shooting position.

Precisely adjustable cheek piece for the best possible shot in all hunting situations and for competitive shooting.

- 1 Slip resistant rubber butt pad, adjustable in length
- 2 SpeedLock 2.0 system (push button) for adjusting the butt plate
- 3 Height-adjustable cheek piece for a relaxed head position. The cheek piece can be tilted sideways in 5° steps.
- 4 SpeedLock 2.0 system (push button) for adjusting the cheek piece
- 5 GRS Sporter stock with ergonomic grip area
- 6 Bolt handle lock
- 7 Sliding safety catch
- 8 Fine-ground bolt with locking lugs
- 9 Picatinny rail, assembled in the factory
- 10 ANSCHÜTZ Precision barrel
- 11 Barrel thread M15x1
- 12 Trigger guard, protects the trigger
- 13 Match two stage trigger 5098/71, 250 - 450 g, factory set at 300 g
- 14 Magazine release lever
- 15 Magazine easy to exchange, made of stainless steel
- 16 Studs
- 17 Cheek piece, adjustable in height
- 18 DJV-Stock, made of beautiful grown walnut
- 19 Non-slip checkering
- 20 Match two stage trigger 5098/71, 250 - 450 g, factory set at 300 g
- 21 Magazine release lever, integrated in the stock
- 22 Magazine easy to exchange, made of stainless steel, ends flat with the stock

Shown: Model 1771 GRS Sporter, caliber .223 Rem., 586 mm barrel and barrel thread M15x1.

Available as an accessory: The barrel weight with 365 g and 116 mm length ensures optimum balance and comfortable swinging in disciplines such as "running boar". The barrel weight is mounted "overbarrel" and therefore does not extend the overall length.

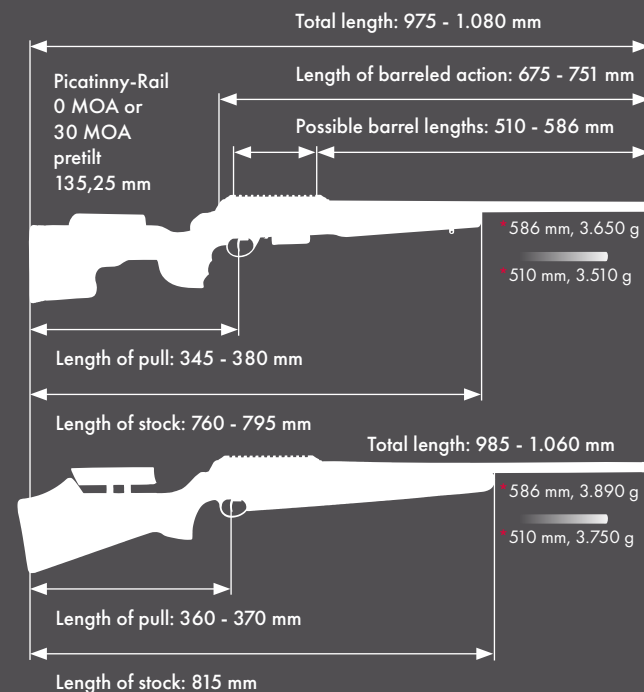

Shown: Model 1771 DJV, caliber .22 Hornet, 510 mm barrel and barrel thread M15x1.

1771 DJV-STOCK AT THE FRONTIER OF HUNTING AND SPORT

Made from beautifully grown walnut wood with the finest oil finish, the stock is specially developed for competitive hunting style shooting. The adjustable cheek piece reduces head tilt and relaxes the neck muscles. The special DJV magazine ends flat with the stock. The fore-end can be hold without annoying elements.

small game hunting grounds and,
at the same time, ideal for **target**
shooting and **training**.

**A Hunting rifle for
(almost) everything!**

1771

EXCEPTIONALLY INDIVIDUAL

Stock and barrel, bolt and trigger, receiver and cartridge – you might think a rifle is, in itself, quite a simple product.

Far from it!

The trigger of the 1771 alone is made up of numerous components! It comes in three versions. Four stocks, two barrel lengths ... the choice of caliber increases the range of configurations considerably.

Combine your requirements, then you'll end up holding a rifle that's been configured so it's virtually one-of-a-kind.

The ANSCHÜTZ 1771.

1771 ACTION

A COMPACT STATEMENT

The lightweight receiver is robust and resistant. Incorporated immovably in the stock for outstanding shooting performance. Sturdy and resistant to heat and cold. With a matt-finished appearance that's timelessly elegant. Equipped with a Picatinny rail - assembled in factory - to make it flexible and versatile. Gas vent holes are an inconspicuous but important detail for your safety.

1771 BOLT

SAFETY FIRST!

Complete without a gap, for maximum safety: Depending on the caliber single-row or two-row three-locking lug. A reliable and durable element.

1771 MAGAZINE STRONG RESERVE

Extremely comfortable to handle! The magazine holds three, four or five cartridges (depending on the caliber), is made from sturdy stainless steel and is thus insensitive to dust, dirt and water.

Recessed muzzle or barrel thread M15 x 1 with thread protector

Magazine made from stainless steel

DJV magazine with extended magazine base

1771 TRIGGER A MASTER STROKE

Precision proven many times over from high-performance sports – in summer and in winter. Depending on the trigger, very wide adjustment range of the trigger weight. Ergonomic and silently operated safety catch.

The location in the rifle with the decisive moment: High-precision parts in harmony in the tightest of spaces for a single task – creating the perfect "interface". The interface between human and rifle. Near to unique, and meanwhile adapted by other manufacturers.

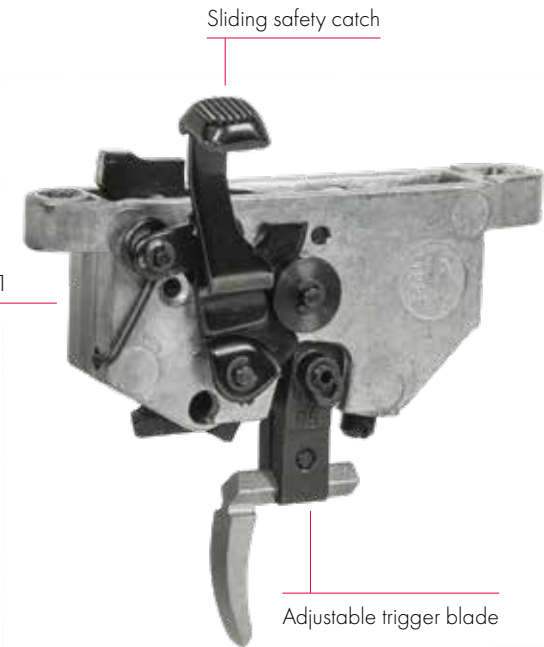

There is nothing better.

High-precision manufactured and lapped individual parts

Single stage trigger 5097/2D Tuning

Two stage trigger 5098/71

Sliding safety catch

Adjustable trigger blade

Three different triggers can be chosen:

- 5098/71 – Match two stage trigger, adjustable from 250 g - 450 g
- 5097/2D Tuning – Match single stage trigger, adjustable from 450 g - 600 g
- 5097/2D – Match single stage trigger, adjustable from 1.000 g - 1.700 g

The background of the advertisement is a blurred forest scene. On the left side, the barrel and wooden stock of an Anschutz 1761 rifle are visible, extending horizontally across the frame. The rifle is held by a hand resting on a weathered wooden post. The overall aesthetic is one of precision and craftsmanship in a natural setting.

ANSCHÜTZ

EINFACH EINS WERDEN!

1761

*THE SYNTHESIS OF HIGH TECHNOLOGY
AND CRAFTSMANSHIP*

.17 HMR | .22 l.r. | .22 WMR

Since 1856, over the course of six generations, we have paired available knowledge with newly-obtained scientific understanding. We generate **trust**, we generate **reliability**, we generate **precision**. All of this, so you can stand up proudly and say:

My ANSCHÜTZ

1761

THE FIRST SHOT

You pick it up, and at once you feel:

This small-bore rifle is something else!

At this moment, you probably won't think immediately about the gunsmith in his studio and about the time spent in **polishing metal components**; maybe you don't know anything about the care with which the technician **lapped** and **honed** the barrel, but the matte surface, the perfectly soft gliding head of the bolt, and the **closed** connection of the stock and framework formed by the hidden thrust bearing will captivate you.

You will likely not even feel the small bearing, the four millimeters of steel support in the interior of the bolt, in which the three-lug locking mechanism ensures a self-centring closure in the action, but you will certainly notice the smooth repeating speed of the 1761.

The way you become one with the 1761 will trigger a smile: My rifle!

You won't want to put it down.

1761 THUMBHOLE STOCK

THE COMPLEX MADE SIMPLE – PRECISION IN PERFECTION

The thumbhole stock. The eye-catcher when it comes to optical and functional advantages. Light walnut, oiled with satin finish; the trigger finger is free to act without being burdened. The milled recesses lend the 1761 in the thumbhole stock a futuristic look, which will maintain its good appearance for many years to come!

Thumbhole stock with ergonomically shaped roll-over cheek piece.

Optional 1761 Picatinny rail with 0 or 30 MOA pretilt available

Model 1761 Classic can be configured as a right-hand or left-hand version, **at no extra charge!**

- 1 Non-slip rubber butt pad
- 2 Ergonomic walnut thumbhole stock, oiled with satin finish
- 3 Integrated groove for optic recoil lug
- 4 Sliding safety catch
- 5 11 mm-ANSCHÜTZ prism rail
- 6 Interchangeable ANSCHÜTZ precision barrel
- 7 Barrel thread 1/2"-20 UNF
- 8 Single stage trigger 5061 D Heavy 800 - 1.600 g, factory set at 1.000 g

- 9 Classic ambidextrous walnut stock, oiled with satin finish
- 10 Studs
- 11 Non-slip checkering in new design
- 12 Trigger guard made of high strength molded polymer
- 13 Match two stage trigger 5061 Heavy 800 - 1.600 g, factory set at 1.000 g
- 14 Magazine release lever
- 15 5-shot magazine, easy to exchange

Shown: Model 1761 thumbhole stock, caliber .22 WMR, 515 mm barrel and barrel thread 1/2"-20 UNF, single stage trigger 5061 D Heavy

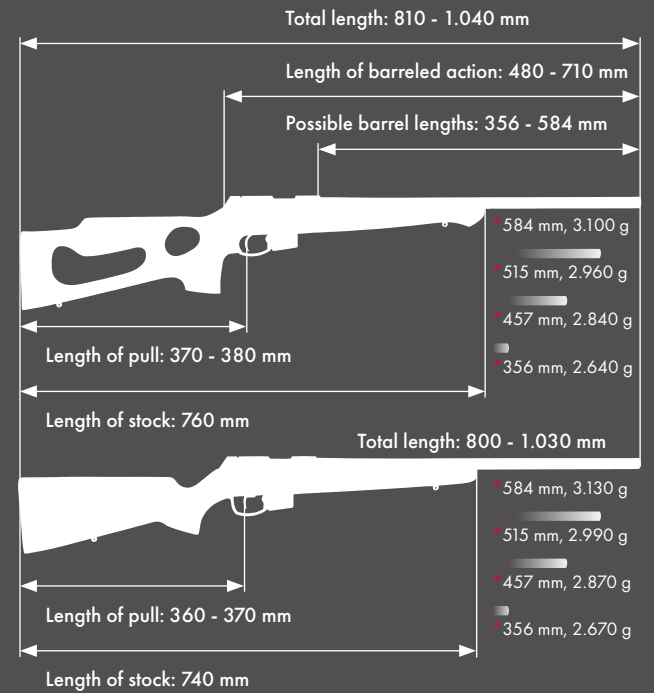

Shown: Model 1761 Classic, caliber .22 l.r., 457 mm barrel and barrel thread 1/2"-20 UNF, two stage trigger 5061 Heavy

1761 CLASSIC WELL-BALANCED

The well balanced and ambidextrous oiled walnut stock. Looks traditional – looks good. For the right-handed shooter, for the left-handed shooter. Straight-forward, effective, low in vibration, well-balanced. Laser-cut, weather-resistant checkering for optimal grip. Shock-absorbing, non-slip rubber butt pad.

1761 MODELS PRODUCT INFORMATION

Model 1761 configurations are delivered depending on the desired configuration with original test target and quality control card.

1761 MONTE CARLO

ELEGANT AND ERGONOMIC

Matt oiled walnut stock with schnabel tip, pistol grip and grippy, finely cut checkering for secure grip even in wet conditions. The roll-over cheek piece offers a perfect and comfortable position of your head when aiming. The configuration shown is equipped with the high-contrast open sight, which obscures very little of the target and therefore allows quick target acquisition. Ideal for quick shots at medium distances without a telescopic sight. The rear sight with three inlaid, yellow illuminated aiming points can be adjusted laterally and in height. The red front sight is protected by the front sight guard and forms a strong contrast - even in poor lighting conditions.

Monte Carlo stock with ergonomically shaped roll-over cheek piece.

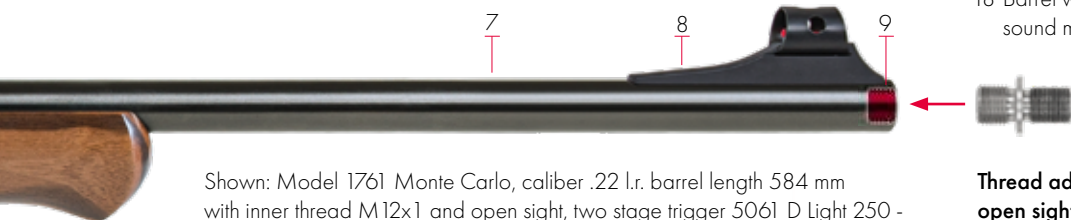

Optional 1761 Picatinny rail with 0 or 30 MOA pre-tilt available

High-contrast open sight with aiming points.

- 1 Non-slip rubber butt pad
- 2 Ergonomic Monte Carlo stock made of beautiful grown oiled walnut with roll-over cheek piece

ANSCHÜTZ Special soft case for hunting and sporting rifles
As a special feature, the new carrying strap system, including a lock, also lets you carry the soft case on your back. Outer dimensions: 1.250 x 250 x 50 mm
Item No.: 015504

1761 MP R MULTI PURPOSE BEAVERTAIL, CAL. .22 L.R.

FLEXIBLE FOR HIGHEST PRECISION

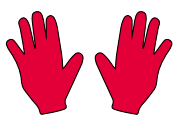

Developed from the needs of shooters from the range and the field, this stock combines the advantages of a classic target stock, combined with the wide and easy to handle beavertail forend. The integrated aluminum rail in the forend makes this stock a great overall package. Stained walnut with stippled checkering at pistol grip, prepared for attaching a butt plate carrier and can therefore be flexibly adjusted in length.

MP R and MS R stocks are prepared for the installation of a clamp piece to mount a butt plate carrier.

Optional 1761 Picatinny rail with 0 or 30 MOA pre-tilt available

Model 1761 MP R can be configured as a right-hand or left-hand version, **at no extra charge!**

- 1 Non-slip rubber butt pad
- 2 Prepared for attaching a butt plate carrier
- 3 Stained Multi Purpose Beavertail stock made of beautiful grown hardwood
- 4 Stippled checkering
- 5 Integrated groove for optic recoil lug
- 6 Sliding safety catch
- 7 11mm-ANSCHÜTZ prism rail
- 8 Heavy ANSCHÜTZ precision barrel

- 9 Reinforced, recessed muzzle with groove for attaching a front sight
- 10 Match two stage trigger 5061 Light, 250 g - 500 g
- 11 Wide and easy to handle beavertail forend with integrated aluminum rail for accessories
- 12 Lacquered stock made of beautiful grown walnut with stippled checkering
- 13 Ergonomic grip with stippled checkering

- 14 Trigger guard made of high strength synthetic
- 15 Match two stage trigger 5061 Light, 250 g - 500 g
- 16 Magazine release lever
- 17 Detachable 5-shot magazine, easy to exchange
- 18 Grip and forend with stippled checkering and integrated aluminum rail for accessories

Model 1761 MP R, caliber .22 l.r.
 Heavy barrel, barrel length 544 mm,
 two stage trigger 5061 D Light 250 - 500 g,
 rubber butt pad
 Item No.: 015539

Reinforced, recessed muzzle
 with groove for attaching a front sight.

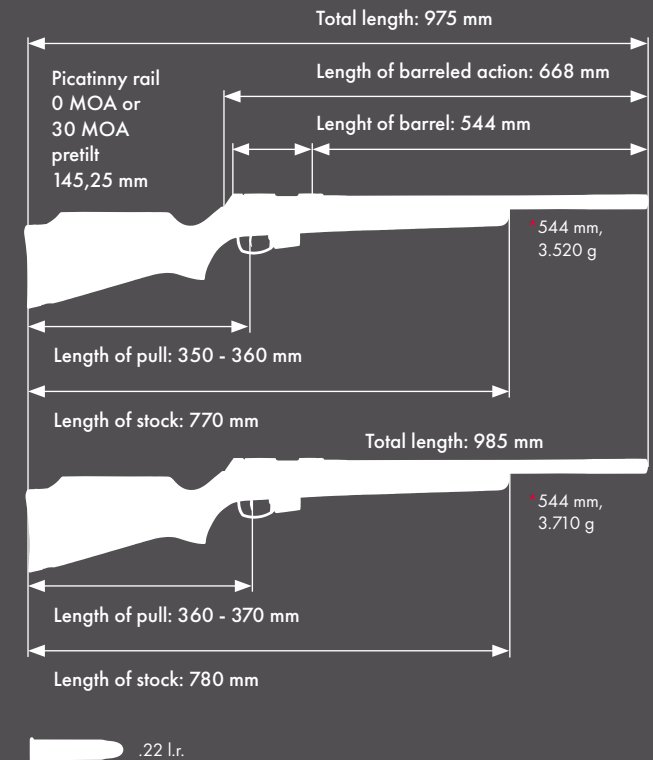

Model 1761 MS R, caliber .22 l.r.
 Heavy barrel, barrel length 544 mm,
 two stage trigger 5061 D Light 250 - 500 g,
 rubber butt pad
 Item No.: 015540

1761 MS R, CAL. .22 L.R THE SPORTING RIFLE

The ANSCHÜTZ small bore rifle for shooting on metal silhouettes and targets. Receiver with an 11 mm ANSCHÜTZ prism rail and grooved barrel for attaching a front sight, so you can also shoot with sight set. Anatomically designed stock with cheek piece especially made for these disciplines. With non-slip and adjustable rubber butt plate and aluminum rail in the forend. The stock is prepared for the assembly of a butt plate carrier – to adjust the stock in length. Stippled checkering on pistol grip and forend.

Scope of delivery:

Model 1761 MPR or 1761 MSR are supplied with a 5-shot magazine, transport rifle case Mega Version II (length 118 cm) and original test target and quality control card.

You can always rely on an ANSCHÜTZ hunting bolt action rifle. Your ANSCHÜTZ rifle will be a reliable companion for you at all times, with unsurpassed precision and functionality. This is what the name ANSCHÜTZ stands for.

ANSCHÜTZ 1761

1761

FIND REPOSE

Shooting is a complex, contradictory act, but ultimately, in the core of its being, it forces the shooter to re-examine himself.

LOOK INWARD – BREATHE – STAY STILL – FEEL – CONCENTRATE ... the actual triggering of the shot is almost of secondary importance.

On the following pages, you will experience the 1761 in its full range of detail. You will see the interplay of cleverly devised components produced with devotion and tested with meticulous attention to detail.

The ANSCHÜTZ 1761.

1761 ACTION

EVERYTHING THAT MAKES A ANSCHÜTZ.

The foundation of our high precision rests on the barreled action design. Geometry inspired by our target rifles, with a high degree of stiffness, a flat supporting surface and an integrated recoil lug. The precision action is manufactured by highly demanding production processes and with gunsmiths expertise.

In the action integrated well engineered ejector can be changed very easily.

The luminous matte surface lends the model 1761 a timeless appearance, which will continue to look excellent even for many years to come.

1761 BOLT RUNS EASY AND QUICK

The small bearing reduces the force needed to open and to close the bolt. Fast and easy repeats are possible. Symmetrically arranged three-lug locking mechanism for the highest safety and phenomenal precision. Simple disassembly for care and cleaning. The high-quality and resistant QPQ coating ensures additional sliding capacity, resistance to wear, and corrosion protection, and thus is perfect for use in hunting and for harsh weather conditions.

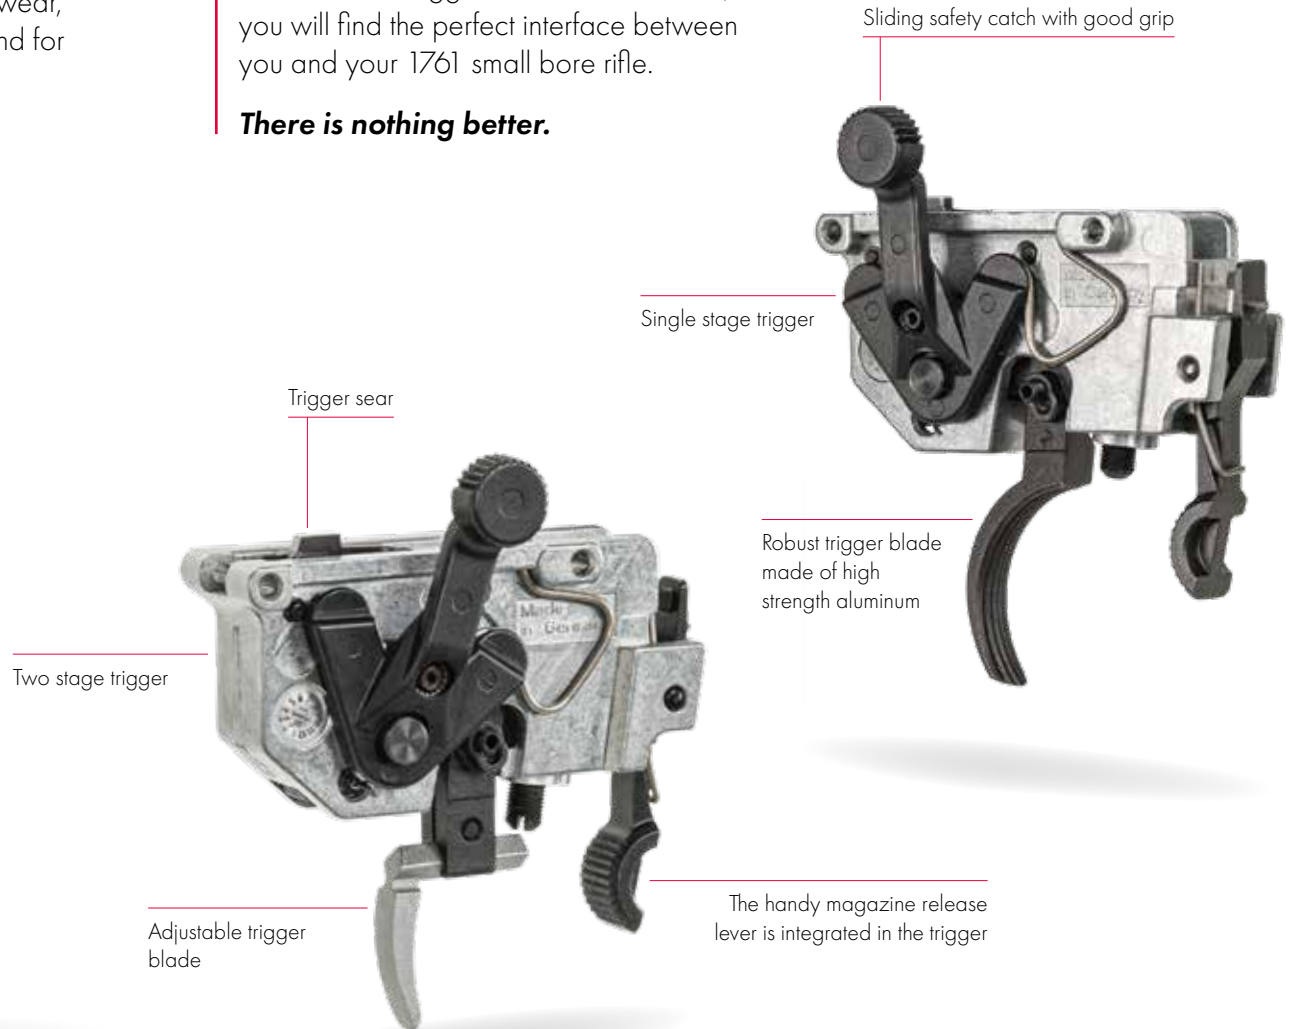

1761 TRIGGER OUR TRADITION

It doesn't matter which kind of trigger you need, whether single stage or two stage, which aiming position is preferred or required, whether prone, sitting, kneeling or freehand standing:

With different triggers for the model 1761, you will find the perfect interface between you and your 1761 small bore rifle.

There is nothing better.

1761 BARREL VERSIONS

EXPERIENCE LEADS TO PRECISION

The 1761 modular system offers the perfect barrel versions for every application. If you need a heavy precision barrel or classic hunting barrels in different lengths - we have what you looking for.

Following barrel versions for your perfect configuration:

- Heavy precision barrel, 21.4" (544 mm) grooved, with reinforced muzzle
- Precision hunting barrels in different lengths
23" (584 mm)
20.3" (515 mm)
18" (457 mm)
14" (356 mm)
- Two different muzzle threads $\frac{1}{2}$ " - 20 UNF and $\frac{1}{2}$ " - 28 UNEF
- Hunting barrel with open sight (FL)
20.3" (515 mm) or 23" (584 mm) with inner thread M12x1
- Barrel with integrated sound moderator (only .22 l.r.)
19.3" (492 mm), the integrated sound moderator is easy to disassemble and to clean

If you would like to change the caliber, the barrel can be easily altered by a qualified gunsmith. Thanks to its two tenon locking clamps, the barrel clamping allows for the barrel to be re-inserted with perfect precision - every time.

1761 OPTICS AND ASSEMBLY

THE LINK

The 11 mm ANSCHÜTZ prism rail integrated in the receiver enables the flexible mounting of a wide variety of optics. The integrated support in the prism rail offers maximum stability and repeatability when mounting our optional 1761 Picatinny rail with 0 or 30 MOA pretilt.

10-Shot,
caliber .22 l.r.
only

1761 MAGAZINE

STRONG HANDLING

The single-stack 5 or 10-shot magazine with a robust stainless steel housing can be changed extremely quick and easy. This is made possible by the release lever integrated into the trigger and the extended magazine base plate. The high-strength magazine base plate is made of weather-resistant polymer.

5-Shot

1761 STOCK AND ACTION BEDDING **THE BASE OF PRECISION**

The oiled Classic hunting stock with its straight comb is suitable for right-handed as well as left-handed shooters (ambidextrous). The non-slip checkering in new design ensures a sure and stable grip even in rain. The ergonomically designed thumbhole stock made of oiled walnut with satin finish ensures stability in the firing position and a relaxed shooting posture thanks to its roll-over cheek piece and its sharp pistol grip.

The MP R Multi Purpose Beavertail stock, as well as the MS R Silhouette stock are equipped with a stippled checkering. Furthermore, these two stocks are the bridge between the needs of the shooting range and the hunting grounds. The aluminum rail in the forend enables the attachment of accessories, such as a hand stop. These stocks are also prepared for the assembly of a butt plate carrier.

The solid and flat bedding of the barreled action in the stock ensures the highest precision. Just phenomenal details.

*FAST, PRECISE
AND ELEGANT*

.17 HMR | .22 l.r.

IMPORTANT SECONDS
FOR HUNTING SUCCESS

**The ANSCHÜTZ
straight pull
barreled action**

1727 F

STRAIGHT-PULL LEADS TO SUCCESS

A straight-pull design means minimal movement in operation and, of course, super-fast cycling of the bolt — both advantages are important when hunting.

With the Model 1727 F we have perhaps the fastest small bore straight-pull model on the market. The precisely crafted barreled action is adapted from our world famous biathlon rifles to meet the needs in the field, dynamic shooting disciplines and on the shooting range.

The result: A high end straight-pull repeating rifle with a target pedigree, aimed for the hunting market.

Fast, precise, elegant.

1727 F

1727 F MODELS – THE PROVEN STRAIGHT PULL ACTION BIATHLON TECHNOLOGY OPTIMISED FOR HUNTING

Wonderfully balanced German stock made of matt oiled walnut. Classic, timeless ergonomics, compact geometry. Subtle hog-back stock with German cheek piece, distinctive schnabel forearm tip. The finely cut checkering on the fore-end underlines the brilliant shooting and repeating performance of the 1727 F: a rifle for lovers of unusual things as well as for technology enthusiasts.

Extremely fast repeating possible by opening the barreled action with the index finger and closing it with the thumb.

German style stock with bavian cheek piece.

THE MEASURE OF ALL
THINGS IN BIATHLON

**A real pleasure
on the hunt**

1727 F

FOR THE TECHNOLOGY ENTHUSIAST

Highly complex interplay of precision mechanics and materials, of high-tech, state-of-the-art manufacturing and know-how. Everything in the smallest of spaces. Created to lead the will to the finish – with maximum safety and outstanding precision.

Like no other name, ANSCHÜTZ stands for progress in biathlon - over 95 % of all athletes trust in ANSCHÜTZ. For decades, the straight pull barreled action was developed to perfection and then optimized for hunting.

The fastest follow-up shots in an almost unchanged shooting position are the result - for training on the shooting range and hunting success.

1727 F ACTION

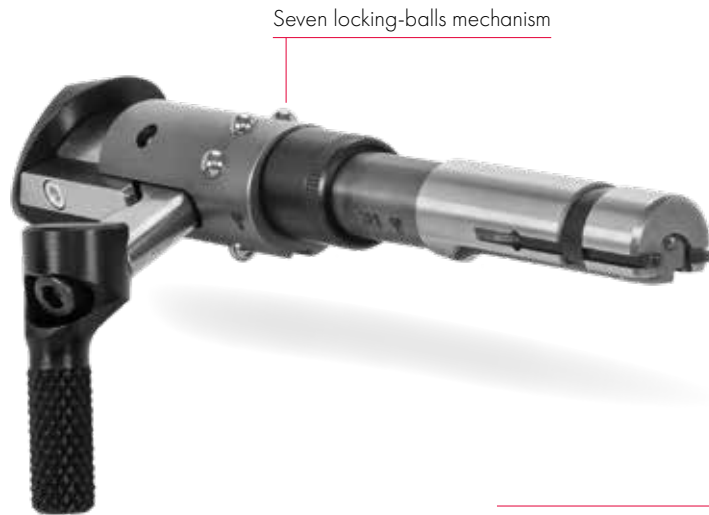

SOLID CORE PIECE

Globally adapted receiver from the biathlon. High-quality coatings: silky smooth (bolt!), particularly resistant (to the effects of weather) and protected against corrosion. Ideal for hunting. The robust receiver carries two 11 mm prism rails for flexible mounting of various hunting optics.

1727 F BOLT FOR THE OLYMPICS

World-famous and winner of several Olympic gold medals at biathlon: the straight pull action. Seven hardened steel balls for a secure lock. The easy-grip, knurled bolt handle, optimised for hunting, enables incredibly fast follow-up shots: The index finger opens - the thumb closes. The movement is made from the wrist, the trigger hand remains on the rifle.

Seven locking-balls mechanism

.22 l.r. Magazine, made of blued sheet steel, 5-Shot

1727 F MAGAZINE SAFELY INTEGRATED

Securely engaged, the magazine disappears almost invisibly into the stock. Made of weather-resistant steel (.17 HMR) or blued sheet steel (.22 l.r.), the magazine defies dust, dirt and water and feeds loaded cartridges precisely and quickly.

1727 F TRIGGER THE BENCHMARK FOR SPORTING RIFLE TRIGGERS

Finest lapping, low weight, specially hardened: a precision piece of extreme robustness. Fine adjustable trigger weight (90 g to 650 g) for target-oriented interaction of the entire action.

The most important part of the rifle in such a decisive moment: High-precision parts in harmony in the smallest space for a single task - to form the perfect "interface", the interface between man and rifle. Close to unique and meanwhile adapted by other manufacturers.

There is nothing better.

SOUND MODERATOR

**Protect your hearing, reduce stress,
shoot better, hunt more relaxed**

ANSCHÜTZ SOUND MODERATOR OBM48*

COMPACT. EFFECTIVE. ROBUST.

This sound moderator with its very high attenuation performance of 32-37 dB (depending on caliber) is an excellent choice for all standard calibers. The slim design, which also proves advantageous when used with attachments, and the low weapon extension make this model an excellent all-rounder. These factors and the high-quality material used make this sound moderator a reliable companion with an excellent price-performance ratio.

In order to keep the length of your hunting rifle with screwed-on sound moderator as short as possible, 73 mm of the total length of the sound moderator is attached above the barrel. This lengthens your firearm with the sound moderator screwed on by only 132 mm.

Overall length of the sound moderator: 205 mm

Total extension of the rifle: 132 mm

Sound moderator shown in original size, scale 1:1

Back

Front

Thread adapter and guide washer fitted ex works, can be replaced if necessary.

OPERATING PRINCIPLE

HOW DOES THE OBM48 WORK?

After a shot, the gases in the propellant charge expand and escape at the end of the barrel. A sound moderator inhibits this through various chambers and specially shaped structures. Our sound moderator OBM48 offers the hot, high-pressure gases flowing out of the muzzle a space in which the extremely high pressure can be reduced. When the gases escape from the sound moderator into the environment, the much lower pressure results in an audibly quieter bang. The more volume the sound moderator provides for this, the greater the expansion effect.

This achieves a significant reduction in the muzzle blast of up to **32-37 dB (decibels)** depending on the caliber used. The volume ratio of the sound moderator also causes a frequency modulation, which makes the perceptible bang sound much duller. Another major advantage of our sound moderator is the clear and noticeable reduction in recoil and the almost complete elimination of visible muzzle flash.

Less shooting stress and therefore better results - with the ANSCHÜTZ high performance sound moderator.

SOUND MODERATOR .22 l.r.*

MAKES QUIET EVEN QUIETER

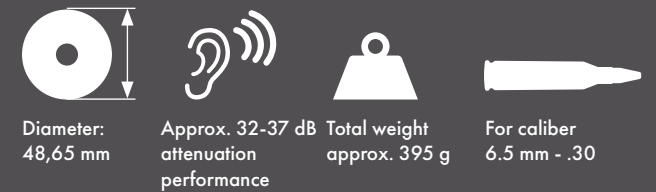

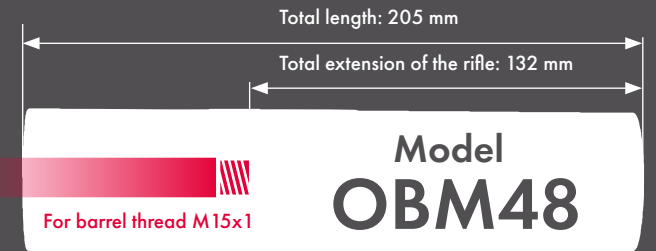

The sound moderator manufactured exclusively for ANSCHÜTZ by the well-known Swiss manufacturer B&T AG has been specially developed for small-caliber rifles in 4,5 - 5,5 mm caliber. The sound moderator made of robust aluminum is prepared for the 1/2"-20 UNF barrel thread.

ANSCHÜTZ ACCESSORIES

SOUND MODERATORS, STOCK AND BARREL ACCESSORIES AND CLEANING

ANSCHÜTZ Sound moderator OBM48 für Kal. 6.5 mm - .30*

This sound moderator with its very high attenuation performance of 32-37 dB (depending on caliber) is an excellent choice for all standard calibers. The slim design, which also proves advantageous when used with attachments, and the low weapon extension make this model an excellent all-rounder. More information on page 80.

Item No.: 017300

ANSCHÜTZ Sound moderator .22 l.r.*

The sound moderator manufactured exclusively for ANSCHÜTZ by the well-known Swiss manufacturer B&T AG has been specially developed for small-caliber rifles in 4,5 - 5,5 mm calibre. The sound moderator made of robust aluminum is prepared for the 1/2"-20 UNF barrel thread.

Item No.: 013290

1771 Barrel weight 365 g

Ensures optimum balance and comfortable swinging in disciplines such as "running boar". Length 116 mm for barrel diameter 19 mm with barrel thread M15x1.

The barrel weight is mounted "overbarrel" and therefore does not extend the overall length.

Item No.: 014684

Thread adapter

From inner thread 1/2" - 20 UNF to outer thread 1/2" - 28 UNEF.

Item No.: 013483

Thread adapter for 1761 barrels with open sight and inner thread

From inner thread M12x1 to outer thread 1/2" - 20 UNF.

Item No.: 016511

Sling swivel (2 Pieces)

For quick and easy assembly of a rifle sling.

Item No.: 007663

Cleaning rod guide 1761

Protects the cartridge chamber and the trigger unit from scratches, cleaning agents and residues from the barrel, made of high-strength synthetic.

Item No.: 015655

Cleaning rod guide 1727

Protects the cartridge chamber and the trigger unit from scratches, cleaning agents and residues from the barrel, made of robust aluminum.

Item No.: 013711

Your dealer:

COMMITTED TO PRECISION **SINCE 1856**

You can always rely on an ANSCHÜTZ hunting bolt action rifle. Your ANSCHÜTZ rifle will be a reliable companion for you at all times, with unsurpassed precision and functionality. This is what the name ANSCHÜTZ stands for.

Numerous Olympic champions, World and European champions as well as over 97% of all biathletes and target shooters in the whole world trust in this ANSCHÜTZ precision. You too can benefit from over 165 years of experience in the field, which has been incorporated into our hunting bolt action rifle, just as you can benefit from the experience of car manufacturers in racing.

For us hunter at ANSCHÜTZ, our products have long been more than just a daily companion through the hunting year - they are the center of our passion.

**ANSCHÜTZ wishes
you a good hunting.**
