## PROMOTION OF SHOOTING SPORT **A MATTER OF THE HEART**

**The promotion of shooting sports and especially the promotion of young talents has always been very close to our hearts.**

Sport, play and exercise are an important cornerstone in the personality development of children and young people. With the ANSCHÜTZ LaserPower technology the exciting sport „shooting“ can be practiced and trained completely unproblematically - especially at the entry age of eight to twelve years, light beam rifles are the perfect sports equipment for shooting sports.

**The early age of entry holds great potential for recruiting members and promoting young talent.**

Due to the completely unproblematic LaserPower light beam rifles, especially shooting clubs can draw attention to the shooting sport in a particularly exciting and at the same time playful way at town, village and shooting festivals or an open day - and thus already introduce children and young people to this sport.

“The masters of the future are the beginners of today. With the ANSCHÜTZ LaserPower models we offer a completely safe way to fascinate children as young as eight years old for the shooting sport.”

*Jochen Anschütz*

## LASERPOWER

# SUPPORTS SHOOTERS IN...

### **I STAMINA**

Stamina is not only about fitness – stamina also means keeping your skill level constant, even over a lengthy period, and being able to focus your mind and body on the target, on success.

LaserPower shooting promotes stamina.

### **II STRENGTH**

Although LaserPower rifles are relatively light in weight, shooting requires a certain amount of muscular strength to take part in a competition and complete a sequence of 20 shots.

LaserPower shooting trains the muscles.

### **III REACTION**

Reaction is closely connected with the action. The decision to fire the shot must be made within a fraction of a second, after and when the sights are on the target.

LaserPower shooting trains the ability to recognize the right moment, as well as teaching the correct reaction.

### **IV COORDINATION**

Coordination takes patience. LaserPower shooting shows its full complexity when broken down into its component parts: Standing still, posture, breathing, and focusing on the target. The shot may not be taken until all the components are in harmony.

LaserPower shooting trains patience and coordination.

### **V POSTURE**

In order to fire precise shots, you need a good position of the rifle in your shoulder. In addition, it's very important to have your feet in the proper position. Your body should not move while you aim your LaserPower rifle at the target box.

LaserPower shooting trains you to find a right and solid posture.

### **VI CONCENTRATION**

LaserPower shooting is a ritual which promotes mental concentration. If you train your mind, you will become more focused and reduce stress.

LaserPower shooting helps you to concentrate and focus.

ANSCHÜTZ LASERPOWER

**PROMOTES THE SHOOTER - AT ANY AGE!**

# LASERPOWER - LIGHT BEAM RIFLE

## USAGE AND TECHNICAL DETAILS

### **Purpose**

The main application is designed for 5 to 10 m and the maximum size of the laser dot which is similar in diameter to the pellet used in Olympic air rifle shooting. The ANSCHÜTZ LaserPower system can be used anywhere and does not require a designated shooting range and approval by the authorities.

In Germany children under 12 years of age can learn the safe handling of sports equipment at an early stage.

Risk-free use in training and introduction of new members to shooting sports. Many children, teenagers and young adults do not know the shooting sport.

The ANSCHÜTZ light beam rifle program makes it possible to get to know and hopefully to love this sport without any risk - and to have access to a wide range of products. Also biathlon stars have laid the foundation for their career with the ANSCHÜTZ LaserPower program.

### **Technical details of the ANSCHÜTZ laser point**

- Laser class 1 in all codes
- Preset range up to 10 m, further distances are also possible
- The target size of the round laser dot depends on the distance and is 4.5 mm in diameter at a distance of 10 m
- Compliance with STANDARD standard (coded)
- Compliance with PLT2 standard (coded) - Precise Laser Target (PLT2 precision target)
- Compatible with RedDot laser targets (not coded)

All LaserPower rifles are designed and optimized for a distance of 10 meters to the target box.

### **Applications**

- Shooting clubs (promotion of young shooters and competitions, as well as on the shooting range to introduce them to top sports and the training of new members).
- Private events (Birthday parties, garden parties, street parties).
- Youth meetings (introducing young people to the shooting sport for the first time)
- City festivals, company events (bring all age groups closer to the shooting sport)
- Schools (sports promotion, concentration)
- Fairs
- Hotels and cruise ships (fun, as well as bring any age group closer to the shooting sport)
- Rehabilitation clinics (sports program, concentration, ADHD therapy)
- Indoor and amusement parks (bring any age group closer to shooting sports)
- Shooting cinema
- Educational training, team building, family sports
- Ski and biathlon clubs
- Sports, fitness and recreational activities

ANSCHÜTZ LASERPOWER

**ALWAYS PROVIDES FUN AND EXCITEMENT - GUARANTEED!**

## LASERPOWER

# FROM PREMIUM LIGHT BEAM RIFLE TO HIGH-TECH AIR RIFLE UNIQUE FEATURES THAT INSPIRE

The possibility to install the ANSCHÜTZ LaserPower IV light beam rifle barreled action in air rifle stocks allows a safe introduction to the shooting sport already at a young age.

Children and young people can thus safely familiarize themselves with the sporting equipment without any restrictions imposed by the firearms law and switch from light beam shooting to an air rifle barreled action with pellets at a later age. The familiar stock and the feeling in the stop remain, only the barreled action must be exchanged.

### The advantages are clear:

- **Modular construction of components,**  
The light beam rifle and air rifle grows with the requirements and a wide range of variety of accessory components available - see example on page 26-27.
- **Multiple use and investment safety,**  
the stock remains identical, regardless of whether it is used as a light or air rifle, thus reducing investment costs, and resources are also conserved.

More information and advantages of the LaserPower system can be found at [www.anschuetz-sport.com/en/Lichtschiesen](http://www.anschuetz-sport.com/en/Lichtschiesen)

1. Getting to know the shooting sport with the ANSCHÜTZ LaserPower light beam barreled action. Non-dangerous laser shot with laser class 1.

2. Replacing the light beam barreled action with a full ANSCHÜTZ air rifle barreled action. Classic shooting with pellets on air rifle ranges and targets.

The stock remains unchanged.

## LASERPOWER

# USE OF EXISTING AND ALSO PREVIOUS AIR RIFLE STOCKS

The LaserPower barreled action is compatible with all earlier 8001, 8002 and 9003 stocks manufactured in 2005 and later, as well as numerous current air rifle stocks.

Use the already existing air rifle stocks of your shooting club and create top current LaserPower light beam rifles from them for your junior staff or new members, for example, to learn how to handle rifles!

LASERPOWER LIGHT BEAM RIFLE

**NOT A RIFLE FOR THE PURPOSES OF THE GERMAN GUN CONTROL LAW**

## INFORMATION ON THE PROVISIONS OF THE GERMAN GUN CONTROL LAW

### YES

“The handling of weapons ... is only permitted to persons who have reached the age of 18.”  
Paragraph 2 WaGG (Weapons Act). Light rifles are structurally not weapons. They are designed in such a way that they are not considered weapons. The laser beam used (laser class I) is absolutely harmless. They are sports equipment and may be used regardless of age and location.

### BUT

Nevertheless, light rifles resemble real weapons; this makes them so-called “prima facie weapons” - it appears that they are weapons. Section 42 of the Weapons Act states, “It is prohibited, to carry apparent weapons.” This does not apply “to transport in a locked container.” So if you practice the sport of light shooting, you have to handle your sporting equipment the same way, as if one were carrying a real weapon: The light rifle, must be transported locked. It is forbidden to use it outside the shooting range, one’s own home or one’s own own property (which must also be “pacified”).

### EXCEPTION

Once again the Weapons Protection Act: “Excluded are such items that are recognizably ... intended for play according to their overall appearance or ... firearms for which [...] a permit to carry is required. Recognizably ... intended for play are in particular items ... that ... contain neon-colored materials or do not have firearm markings.”

**In principle, light guns are allowed in children and youth work because of the playful character of training and competition. The focus here is on imparting sporting skills.**

*Note: Please observe local firearms regulations!*

LASERPOWER

**GETTING STARTED IN TARGET SHOOTING**

## LASERPOWER SHOOTING SHOOTING COMPETITIONS

### **Speed, coordination, skill and concentration**

This form of target shooting mainly serves to promote the creativity and play instinct of children aged from 6 to 11 years. In addition to a 20 shot program with the LaserPower rifle, children can also demonstrate their ability in the areas of speed, coordination, skill, and concentration.

The goal of this competition is to introduce children to competitive shooting through play and also respond to the urge to be active at this age. The German Junior Laser Power Shooting Championships are organized by the German Junior Shooters' Association.

In order to participate in these competitions, the children do not need any special clothes or other equipment. All they need is a LaserPower rifle. This enables many children to take part in such competitions easily.

Our LaserPower rifles have enabled ANSCHÜTZ to make its international experience in professional sport accessible to everyone.

# LASERPOWER IV ALU LIGHT

## SIMPLE AND ROBUST

The LaserPower barreled action in the well-known and proven aluminum stock in the LIGHT version. The stock can be perfectly adapted to personal needs. This is made possible by the height-adjustable cheek piece and the length-adjustable butt plate carrier. The non-slip rubber butt plate can be adjusted in height. The fore-end riser block can be adjusted to three different heights. The fore-end of the stock, is equipped with a grooved rail, which allows you to mount a hand stop. Furthermore, the grip can be turned and moved length-ways. A balanced overall package - light, easy to use and ergonomically adaptable to individual requirements - the **LaserPower IV Alu Light**.

Rubber butt plate 4709 A, adjustable in height.

**Fore-end riser block**  
The fore-end riser block is adjustable to three different heights.

**ANSCHÜTZ**

EINFACH EINS WERDEN!

- 1 Rubber butt plate 4709 A
- 2 Aluminum butt plate carrier
- 3 Cheek piece, infinitely adjustable in height
- 4 Cocking knob
- 5 Rear sight 6805
- 6 LaserPower barrel, Laser class 1
- 7 Front sight M18
- 8 Aluminum stock
- 9 Pistol grip, versatile adjustable
- 10 Two stage trigger, also adjustable as single stage trigger
- 11 Trigger guard, to protect the trigger
- 12 Fore-end riser block
- 13 Muzzle, 20 mm diameter

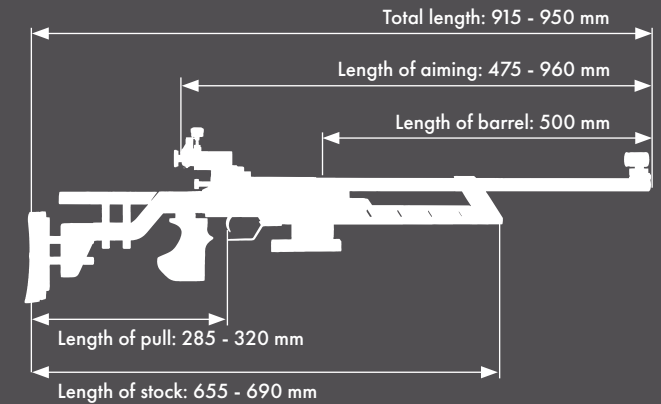

The laser shot encoding in the LaserPower IV rifle can be changed from the preset STANDARD encoding to the ANSCHÜTZ encoding via a DIP switch on the rifle circuit board. This means that the ANSCHÜTZ LaserPower models can be fired at ANSCHÜTZ target boxes and many other target boxes of various manufacturers.

# LASERPOWER IV ULTRA LIGHT

## THE LIGHTWEIGHT, FOR THE YOUNGEST AMONG US

The absolute lightweight among the LaserPower light beam rifles. This light, 3D-printed stock weighs almost 810 g and therefore only weighs approx. 2,000 g in combination with the LaserPower barreled action. In terms of weight and dimensions, this model is designed for the physical requirements of around 8-12 year olds. The length of the buttstock has also been adapted to the height of children and shortened by 20 mm - so that every child can use the light beam rifle well and have fun with it. The stock is equipped with the robust and non-slip rubber butt plate 4709 A, which can be adjusted in height. Furthermore, the fore-end elevation can be adjusted to three different heights. All this with attractive neon green colored add-on parts or as an elegant variant with walnut wood!

The laser shot encoding in the Laser Power IV rifle can be changed from the preset STANDARD encoding to the ANSCHÜTZ encoding via a DIP switch on the rifle circuit board. This means that the ANSCHÜTZ Laser Power models can be fired at ANSCHÜTZ target boxes and many other target boxes of various manufacturers.

Only

## LASERPOWER IV JUNIOR & LASERPOWER IV CLUB

# THE EASY START INTO THE WORLD OF TARGET SHOOTING

The optically appealing laminated wood stock is suitable for left- and right-handers. The versatile adjustable cheek piece in combination with the COMFORT butt plate carrier allows you to adjust the LaserPower rifle perfectly to your body size. This stock is also available with the rubber butt plate 4709 A from our extensive modular system, which has a wider and extremely non-slip contact surface and therefore sits perfectly on the shoulder. The fore-end is equipped with an aluminum grooved rail, which makes it possible to mount a hand stop or other accessories.

The laser shot encoding in the LaserPower IV rifle can be changed from the preset STANDARD encoding to the ANSCHÜTZ encoding via a DIP switch on the rifle circuit board. This means that the ANSCHÜTZ LaserPower models can be fired at ANSCHÜTZ target boxes and many other target boxes of various manufacturers.

The ANSCHÜTZ butt plate carrier COMFORT offers even more features to the shooter:

- Larger, step-less adjustment range.
- Fast, tool-free height adjustment of the butt plate.
- Compatible with stocks with a 30 mm column clamp.
- Individually adjustable stops in height.
- The butt plate can also be positioned over the middle of the barrel.

The fore-end is equipped with a grooved rail, to mount a hand stop.

# LASERPOWER IV WALNUT LIGHT

## NATURALLY! START SHOOTING SPORTS

The elegant walnut LIGHT stock, for fans of a classic walnut stock. Equipped with the versatile adjustable aluminum butt plate 4759, this lightweight stock sits comfortably on the shoulder. The infinitely height-adjustable cheek piece guarantees a relaxed head position. Furthermore, this stock is also ideal as a club variant, since this stock can be used by both right- and left-handed shooters. The aluminum grooved rail allows you to mount a hand stop at any time to stabilize your shooting position.

The laser shot encoding in the LaserPower IV rifle can be changed from the preset STANDARD encoding to the ANSCHÜTZ encoding via a DIP switch on the rifle circuit board. This means that the ANSCHÜTZ LaserPower models can be fired at ANSCHÜTZ target boxes and many other target boxes of various manufacturers.

The aluminum butt plate 4759 can be adjusted in a variety of ways, whether pivoting, adjusting the height or precisely adjusting the hook.

The fore-end is equipped with a grooved rail, to mount a hand stop.

## LASERPOWER IV BENCHREST START

### A SOLID BENCHREST FOR YOUR RIFLE!

The ANSCHÜTZ LaserPower barreled action in the classic benchrest stock for beginners. Anatomically perfectly shaped, made of beautifully grown walnut wood. Suitable for right- and left-handed shooters, with a height-adjustable cheek piece. The fore-end can be swiveled by 7° and offers a two-point benchrest. The buttstock is prepared for mounting the clamp guide 009279. By installing the clamp guide, all ANSCHÜTZ butt plate stabilizers with 30 mm column guides can be mounted. This allows the stock to be adjusted to the individual length of pull.

The laser shot encoding in the LaserPower IV rifle can be changed from the preset STANDARD encoding to the ANSCHÜTZ encoding via a DIP switch on the rifle circuit board. This means that the ANSCHÜTZ LaserPower models can be fired at ANSCHÜTZ target boxes and many other target boxes of various manufacturers.

Easy to handle and equipped with a sturdy hardwood stock which is suitable for right- and left-handers. The precise sight set with a rear sight and a front sight supports a successful "shot" at the supplied target box, including a target reducer and remote control.

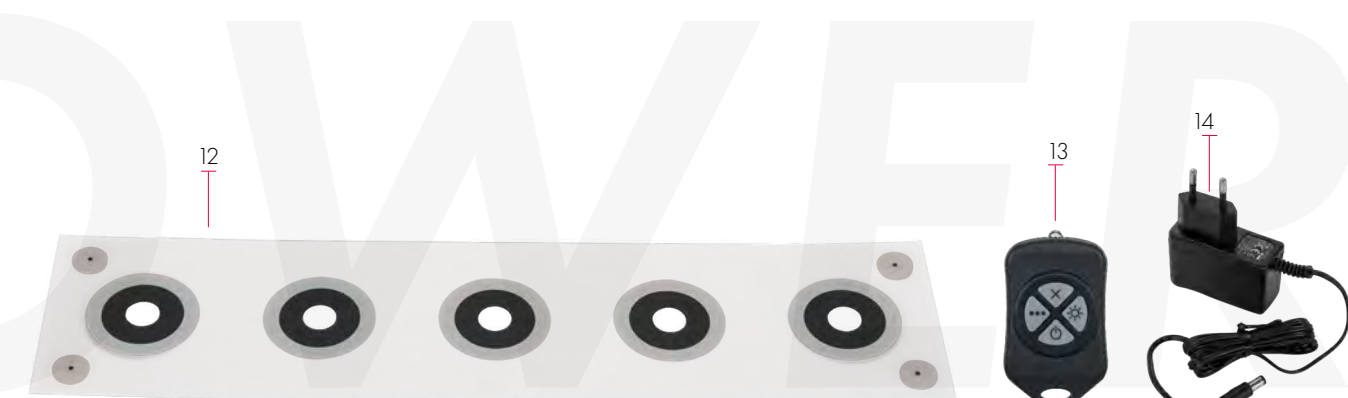

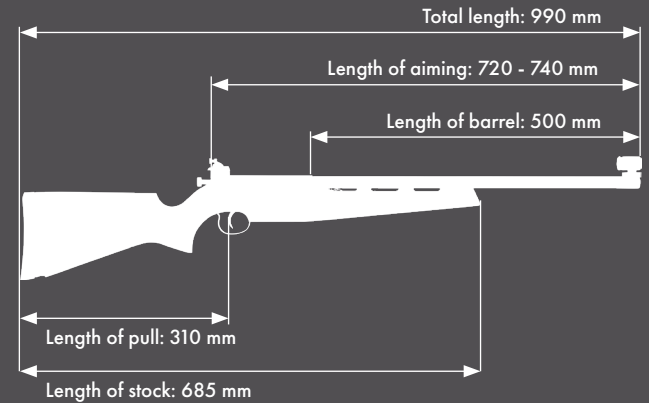

- 1 Rubber butt plate, adjustable in height
- 2 8 mm Spacer
- 3 Oiled beech wood
- 4 Cocking knob
- 5 Rear sight on 8 mm rear sight riser block
- 6 LaserPower barrel, laser class 1
- 7 Front sight M18
- 8 Prepared to accept the clamp guide 009279 for mounting a butt plate carrier
- 9 Stippled checkering
- 10 Two stage trigger, also adjustable as single stage trigger
- 11 LaserPower IV target box
- 12 Target reducer
- 13 Remote control
- 14 Power adapter for LaserPower target box
- 15 Muzzle, 20 mm diameter

The laser shot encoding in the LaserPower IV rifle can be changed from the preset STANDARD encoding to the ANSCHÜTZ encoding via a DIP switch on the rifle circuit board. This means that the ANSCHÜTZ LaserPower models can be fired at ANSCHÜTZ target boxes and many other target boxes of various manufacturers.

**Item No.: 000956**

**Protective flap for LaserPower summer biathlon**  
The protective flap keeps the barrel and front sight free from water and dirt.

**Item No.: 016573**

**LaserPower rear sight**  
Simple LaserPower rear sight, suitable for 11 mm grooved rail.

**Item No.: 016572**

**M18 Front sight-radially pivotable**  
Front sight tunnel incl. transparent aperture insert 4,0, radially pivotable. Suitable for 11 mm grooved rail.

**Item No.: 000982**

**Sight riser block 6817,** with strong clamping for prism milling 11 to 13 mm, height 8 mm.

**Item No.: 001064**

**6817-U2 Front sight riser block**  
Increase for front sight, 8 mm. Suitable for 11 mm prism rail.

**Item No.: 001066**

### Table stand for LaserPower target box

LaserPower IV table stand made of aluminum, quick and easy to assemble (target box shown not included).

Item No.: 013803

### LaserPower IV target box version 4x, 5-targets - Set

With the LaserPower target box, even the little ones can emulate their biathlon idols. The LaserPower target box is based on the biathlon targets (discs) and shows by illuminated target fields whether you have landed a hit. The target box can be operated with a mains adapter or with batteries. This makes it possible to operate the target box outdoors without a power supply, for example. The included target reduction reduces the target field size from 35 mm to 15 mm.

Item No.: 015478 (Set complete, including target box, target reduction, power supply and remote control)

Item No.: 016575 (Target box only)

### LaserPower IR Remote control for target box from V3.x

Remote control for LaserPower Biathlon target boxes from version V3.x.

Item No.: 016577 (4 Buttons - on/off - brightness of the target fields, version selection and delete)

Item No.: 016578 (2 Buttons - on/off and delete)

Item No.: 016579 (1 Button - delete only)

### LaserPower power adapter 5V for target box from V3.x

Power adapter for the LaserPower target box. Alternatively, the target box can also be operated with batteries.

Item No.: 016576

### LaserPower Fun Action Target

The Interactive Multi Training Targets System ("i-MTTs") is a fully interactive training system that allows you to simulate various training exercises. The five i-MTTs target modules communicate wireless and can be set up flexibly in order to constantly create new challenges. Four different targets are available for each target module. Furthermore, five different modes can be set on the targets (stand alone / steel plate shooting / chase the ball / shoot-don't shoot / double speed shoot - don't shoot).

Item No.: 015677

# ACCESSORIES FOR THE FINISHING TOUCH

Your Dealer

„ANSCHÜTZ researches and produces at high-tech level. We draw on a source of traditional craftsmanship which has never become old-fashioned.

This is a tradition which ultimately means consistency and perseverance and not letting ourselves be seduced by short-lived trends, even if they may be tempting.

We therefore see ourselves as the guardians of excellence ‚Made in Germany‘. We manufacture almost all the components of our rifles ourselves.

The pride of our employees in ‚their‘ company is based on the knowledge of their extraordinary responsibility – in the same way as the ANSCHÜTZ company is proud of its employees!“

ANSCHÜTZ rifles are not just simple production firearms. They are individual masterpieces that are designed, assembled and tested with the utmost attention to detail.
